

Zoha Rakotomalala

AI/ML SOFTWARE ENGINEER · CLOUD & MLOPS

✉ zoha.rakotomalala@gmail.com | 📱 zoha-rakotomalala | 🌐 ZohaRak

Software and cloud engineer with a production-reliability focus and a strong pull toward AI/ML. Drawn to hard problems, new technologies, and work that keeps me learning.

Skills

Languages & ML	Python · Java · JavaScript · SQL · C++ · scikit-learn · pandas · Angular
Cloud & MLOps	AWS (CDK, Lambda, DynamoDB, S3, CloudWatch) · Docker · Linux · Git · CI/CD
AI Systems	LLM-integrated systems · Model Context Protocol (MCP) · agentic tooling · Dataiku
Languages	French (native) · English (full professional) · Spanish · Urdu · Hindi

Work Experience

Software Development Engineer

AMAZON

• Xenos / CrossMarket Pricing

Paris, France

SELLER-FACING TEAM

Jan 2026 - Present

- Delivered a cross-region cloud migration (DARU, DUB → ZAZ): stood up a tax-accessor service in a new AWS region and drove a Redshift descale that removed ~15% of the cluster footprint for ~€135K/year in recurring savings
- Own operational excellence and infrastructure modernization on Linux/AWS: build and deploy infrastructure-as-code (CDK), migrate and decommission legacy cloud resources to cut operational overhead and recurring cost
- Lead a backend service migration (Java) onto a new gateway API, verifying output parity against the legacy path and wiring shadow/integration testing before production dial-up
- Designed and led a team knowledge-sharing session on AWS cross-region / cross-account networking, raising the team's fluency in multi-account, multi-region service connectivity
- Hold oncall responsibility for production systems, ensuring reliability and rapid incident response

• Price Perception

Amsterdam, Netherlands

CUSTOMER-FACING TEAM

May 2024 - Dec 2025

- Championed GenAI adoption on the team: pioneered AI-assisted development tooling (~27h documented time savings) and presented on the Model Context Protocol (MCP) and its architecture for AI-integrated systems to **40+ engineers** at an internal conference
- Owned the Omnibus ES price-transparency (EU legal directive) launch and its COE end-to-end after a senior engineer transferred out, delivering on schedule with **zero compliance violations**; created reusable MCM templates that cut complexity for **8+ later marketplace deployments** by ~40%
- Authored the post-mortem after a production compliance incident, driving root-cause analysis across interconnected systems and mitigation to closure, reinforcing governance and security discipline
- Owned the operational-excellence goal for deployment pipeline health, systematically root-causing failures to reach **92% by year-end** (vs. 85% target); resolved **15+ production incidents** on oncall with zero self-caused outages
- Supported Price Tracker backend expansion to **8 marketplaces** (JP, CA, AE, IN, MX, ES, IE, IT); designed a price-history architecture weighing real-time vs. pre-computed approaches for latency and scalability
- Coordinated across engineering teams and senior stakeholders; supervised an intern for 5 months and served two years as team-health champion, owning the feedback and action-item cycle

Software Engineering Intern

Paris, France

DATAIKU - VIDEO DEMO LINK

July 2023 - December 2023

- At a leading enterprise ML/AI platform company, built a **1900-line** feature to generate and display foreign-key relation graphs across database tables: indexed keys via JDBC, generated graphs with Graphviz over data retrieved from Elasticsearch, and built an interactive Angular navigation component.

Education

Triple Degree - EDHEC | SKK GSB | UC Berkeley

GLOBAL ECONOMIC TRANSFORMATION & TECHNOLOGY (GETT)

September 2019 - 2023

- UC Berkeley, Haas** (Diploma, GETT) Aug 2022 - May 2023
- SKK GSB, Sungkyunkwan University** (MiM Studies) Jan 2021 - May 2021
- EDHEC Business School, Paris** (MiM, Full English track) Sep 2020 - Dec 2020
- Relevant CS & data coursework:** Data Structures, C++ & Python, Data Analytics, AI & ML for Business, Genetic Data Automation, Data Science for Finance, Web Development, Cryptoeconomics & Blockchain

Lycée Saint-Louis

Paris

CPGE MPSI / MP (MATHS, PHYSICS, CS, ALGORITHMICS): COMPETITIVE PREPARATORY CLASS FOR THE GRANDES ÉCOLES

2017 - 2019
