*Studied business, taught myself software engineering, and haven't looked back. I build with AI coding agents every day, and I spend a lot of my time showing other engineers how to do the same.*

## Skills

|                |                                                                                                                                                                   |
|----------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| AI Engineering | AI coding agents (Claude Code, Kiro, internal agents) · Model Context Protocol (MCP) · agent workflows and context engineering · LLM-assisted migration pipelines |
| Programming    | Python · Java · TypeScript · JavaScript · SQL · React Native · Angular                                                                                            |
| Cloud & DevOps | AWS (CDK, Lambda, DynamoDB, S3, CloudWatch) · Docker · GitHub · CI/CD                                                                                             |

## Talks & Enablement

- Internal conference talk on **Model Context Protocol**: what it is, why it matters, and how to wire agents into real developer workflows
- Recurring hands-on knowledge-sharing sessions for my org, including a session on cross-region networking patterns
- GenAI and agent-workflow enablement for **40+ engineers**: live demos, worked examples, and reusable migration-by-example templates other teams now use

## Projects
